

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	31 January 2025
Team ID	SWTID-2026-9263
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Team members identified the manual effort involved in requesting, reviewing, approving, and fulfilling standard laptop orders.

Problem Statement: Standard laptop procurement requests are handled through multiple manual steps, which can cause delays, inconsistent information, repeated follow-ups, and limited visibility into request status.

Goal: Streamline the procurement process by using ServiceNow Flow Designer to automate standard laptop requests from submission through approval and fulfillment.

Step-2: Brainstorm, Idea Listing and Grouping

1	Create a standard laptop request form with predefined laptop options and required requester details.
2	Automatically validate mandatory information before the request enters the workflow.
3	Route the request to the appropriate approver based on predefined business rules.
4	Send automated notifications when a request is submitted, approved, rejected, or completed.
5	Create fulfillment tasks automatically for the IT/procurement team after approval.
6	Maintain a central request record so users and support teams can track progress.
7	Use Flow Designer to connect approvals, task creation, notifications, and status updates in one workflow.

Step-3: Idea Prioritization

High Priority: Standardized request form, automated approval routing, automatic fulfillment task creation, and status notifications.

Medium Priority: Request tracking dashboard and additional notification templates.

Future Enhancement: Reporting and analytics for procurement turnaround time, request volumes, and recurring laptop demand.

Prioritization Basis: Ideas were grouped according to their direct impact on reducing manual work, improving process consistency, and increasing visibility.
